Acute Calculations

METHOD OF CALCULATION FOR MEASUREMENT OVER BALLS ACUTE ANGLES $\left(90^{\circ}-a^{\circ}\right)$

$$
\begin{aligned}
& \angle b=\frac{90^{\circ}-\angle a}{2}=37^{\circ} 30^{\prime} \\
& \text { CALCULATED DIMENSION }=\operatorname{COT} \angle b+1.000 \times B A L L \text { DIA. } . \\
& \text { CALCULATED DIMENSION }=\operatorname{COT} 37^{\circ} 30^{\prime}=1.3032 \\
& \text { PLUS } \frac{1.0000}{2.3032}
\end{aligned}
$$

TIMES BALL DIG. X 5000

$$
\text { CALCULATED DIMENSION }=1.1516
$$

$$
\begin{aligned}
& \text { M.O.B.(O.D. })=\text { PART DIA.(O.D. })+1.1516 \\
& \text { M.O.B. (I.D. })=\text { PART DIA.(I.D. })-1.1516 \text { PLUS } 2 \text { BALL DIAS. }
\end{aligned}
$$
